

Sky Scout Drones LLC – Capability Statement

Core Competencies:

- Aerial LiDAR mapping ($\pm 2-5$ cm accuracy) for high-precision geospatial data
- Photogrammetry & 3D modeling for infrastructure and terrain mapping
- Thermal imaging inspections for disaster, infrastructure, and environmental monitoring
- Post-disaster aerial assessment and damage documentation for FEMA, state, and municipal agencies
- MLS real estate photography (ground and aerial)

Differentiators:

- Veteran-owned small business with rapid deployment capability across Florida and the Southeast
- Equipped with advanced aerial sensors: Zenmuse L2 LiDAR, P1 photogrammetry camera, and H20T thermal
- Proven data accuracy suitable for engineering-grade mapping deliverables
- Our aerial LiDAR provides rapid, site-wide coverage at centimeter accuracy, serving as a force multiplier for licensed surveyors and engineers by reducing field time and accelerating project delivery
- Extensive experience delivering both visual and geospatial data products
- Strong relationships with local agencies and proven track record in aerial imaging projects

Past Performance:

- MLS photography and aerial imaging for regional Realtors
- Chamber of Commerce collaborations for community and business initiatives
- Winner – Veterans Pitch Competition (\$2,500 award), hosted by SCF Manatee, 26 West Center
- Support for municipal and county aerial documentation needs
